

What is your Emergency Action Plan awareness?

Author: Kathie

The Emergency Planning team would like to get a better understanding of the level of awareness National Grid employees have of their location/building's Emergency Action Plans (EAPs), including where to find them, and who the EAP team members are. This will help Emergency Planning target their communications and outreach efforts. Why is knowledge of the EAP important? Awareness of your plan will ensure that all employees, visitors and contractors will respond safely in the event of a fire or any other hazard in any of our facilities.

Field and office-based employees: [please take the 2-minute survey.](#)
